March 18, 2008

It is with great excitement that we announce the launch of our newest ERIS insurance product, Privacy and Network Liability insurance. Our Privacy and Network Liability insurance policy has been created to provide a Canadian solution to the potential costs associated with a company's privacy or network breach. The policy provides coverage for liability arising from a privacy or network breach and the expenses associated, including public relations and notification costs.

As privacy breaches become more prevalent in Canada and the associated costs continue to rise, the demand for this type of product has increased substantially. We are pleased to address this need with a uniquely designed solution to address the risks faced by Canadian companies.

For more information on this product please visit our website at [www.execurisk.com](http://www.execurisk.com) or contact one of your Executive Risk team:
